Reference: Contract #RD-113, Task 3

Subject: Change in Delivery Schedule

Gentlemen:

The stipulated work under this Task was originally scheduled for completion on or before May 31, 1958 as indicated in your change order, No. 5, dated December 10, 1957. Based upon this the first prototype was to have been completed by January 31, 1958. We regret to inform you that during the course of environmental tests certain portions of the system appeared to be operating on a marginal rather than reliable basis. As a consequence we have replaced questionable components and have since regained the low temperature reliability. It is unfortunate that these factors cannot be ascertained prior to the completion of environmental tests, and as a result the delivery of the prototype has been delayed.

Your Project Engineer is to be present during the rest of this week to observe the completion of the environmental tests. The prototype will be available for delivery by this week's end.

In view of the above we respectfully request a change in schedule which will provide for a reasonable time of acceptance by your activity and the four months time originally requested for the completion of five additional units. Estimating at this moment that approval of the prototype can be effected by March 31, the completion of the five additional units we request be extended to four months subsequent to that date, July 31, 1958.
